

YUNIDH MEENA

Full Stack Developer | AI & LLM Applications

Bengaluru, India | +91 80942 69471 | yunidhkumarm@gmail.com | github.com/yunidhmeena

SUMMARY

Full stack developer from Bengaluru who builds web applications with React, Node.js, and MongoDB. Delivered two production client sites as a freelance web developer and completed a full MERN e-commerce build with JWT authentication and a REST API. Designs interfaces in Figma and builds responsive frontends from them. Currently learning AI engineering in practice: OpenAI and Gemini APIs, LangChain, and RAG (Retrieval-Augmented Generation). B.Tech Computer Science student at Jain University, expected to graduate in 2027. Open to junior full stack developer roles and AI engineering internships.

SKILLS

- **Languages:** JavaScript (ES6+), Python, HTML5, CSS3, SQL
- **Frontend:** React, Vite, Tailwind CSS, responsive design, HTML/CSS layouts
- **UI / UX Design:** Figma (wireframes, mockups, prototypes), layout and interaction design
- **Backend:** Node.js, Express.js, REST APIs, JWT (JSON Web Token) authentication, middleware, bcrypt
- **Databases:** MongoDB (Mongoose), PostgreSQL, MySQL, Firebase
- **AI / LLM:** OpenAI API, Gemini API, LangChain, RAG (Retrieval-Augmented Generation), prompt engineering, embeddings
- **Tools:** Git, GitHub, Linux, Vercel, Netlify, Render, Docker (basic)

WORK EXPERIENCE

Freelance Web Developer | Self-employed, Bengaluru 09/2024 - Present

- Built and delivered two production websites for business clients, a machinery company and a brokerage firm, owning each project from the first client meeting to launch.
- Wrote the frontends by hand in HTML, CSS, and JavaScript with responsive layouts that hold up on phones, tablets, and desktops.
- Wired contact forms into a thank-you confirmation flow on the machinery site so customer inquiries reach the client directly.
- Worked with clients one on one to revise designs in Figma and shipped fixes after launch on my own schedule.

PROJECTS

MERN E-Commerce Store | React, Node.js, Express.js, MongoDB 02/2025 - 05/2025

Code: github.com/yunidhmeena/E-commerce

- Full stack e-commerce application in the MERN stack (MongoDB, Express.js, React, Node.js) with a product catalog, shopping cart, checkout flow, and admin product management.
- Structured the Express backend in layers (routes, controllers, models, middleware) with REST API endpoints, JWT authentication, bcrypt password hashing, and cookie sessions.
- Handled product image uploads with Multer and built the React frontend with Vite and Tailwind CSS against the REST API.
- Completed as a structured course build to learn production code organization; all work is committed to my GitHub for review.

Linux System Monitor | Python, psutil, matplotlib 05/2025

Code: github.com/yunidhmeena/system_monitoring

- Wrote a Python command line tool that reports live CPU, memory, and disk usage on Linux using the psutil library.
- Added matplotlib graphs so usage trends are visible over time, and documented setup and usage in the README.

EDUCATION

B.Tech Computer Science and Engineering | Jain University, Bengaluru Expected 2027

- Relevant coursework: data structures, databases, operating systems, web technologies.
